PACKING OF EXHIBITS

A. Protection against Damage and Weather Conditions

As the exhibits are repeatedly loaded and unloaded during transportation, shipping hazards such as shocks, bumps and vibration are inevitable. Moreover, exhibits may be placed outdoors many times, including open-air storage areas at the event venue before and after the exhibition. Therefore, exhibitors must take all necessary precautions against damage and weather, as the exhibitor alone shall be responsible for any damage incurred. This is especially true when return exhibits are repacked with used packing materials (flimsy cases, as well as packing materials like aluminum foil, plastic covers, etc., are very often damaged during the unpacking process).

B. The Case

Your shipping case must be strong enough to avoid damage during transportation to and from the event. We do not recommend cardboard cartons of any kind for valuable or delicate equipment. If your shipment is packed in a wood crate please make sure your case meets all ISPM 15 regulations. (http://www.ispm15.com/ISPM15_Revised_2009.pdf)

C. Insurance

It is highly recommended that you purchase insurance for your shipment in the event of damage during transport. The coverage that is provided by carriers is typically pennies on the dollar and can often be difficult to prove where the damages occurred and therefore hard to get payment. FNtech does not provide additional insurance for shipments beyond what is provided by our chosen courier.

ADDITIONAL SERVICES

For additional services not listed in manual, an individual quotation will be given upon receipt of specific requirements. Tariffs and forms are below.
